

## COVID-19 Update:

As we continue to follow the U.S. Center for Disease Control (CDC) guidelines for protecting our patients and ourselves, we continue to provide exceptional care to our patients. We remain OPEN to provide the necessary medical care that you need in order to manage pain and remain physically abled through this difficult time for everyone. We remain COMMITTED to providing necessary services for your health and well-being.

The Department of Homeland Security has classified our profession as a part of the Essential Critical Infrastructure Workforce. The department has deemed it imperative for us to continue with our regular operations in order to unload the burden on the rest of the medical community as they manage the COVID-19 emergency. As stated by Dr Matos, an expert and member of an advisory group in Chemical, Biological, Radiological, and Nuclear Defense:

*“Physical therapists are essential in flattening the curve of the COVID-19 pandemic. They play a key role in keeping people they can help out of the doctor offices and ER’s. This will not only free up the medical teams to treat those impacted by COVID-19, but also limit the exposure of those seeking the care of the physical therapist”.*

With direct access privileges in the state of Michigan, we are available for you to utilize our expertise so that you can promptly handle your pain and symptoms. Direct access allows a physical therapist to evaluate, diagnose, and treat patients without requiring a physicians prescription to access care. You may call any of our 19 locations directly.

We will continue to take the necessary measures as guided by CDC to allow us to provide you the care you require. As this remains a fluid situation, we will continue to monitor and provide updates as necessary. Our patients, employees, and community remain our first priority.

Thank You!  
PPTS Team
